

# IN30plus

The incubator I is perfect for the world of research, medicine, pharmaceutics and food analytics, as well as food chemistry.

Setting temperature range at least 5 sbove ambient temperature to +80 °C  Setting accuracy temperature  Temperature sensor 2 Pt 100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error  Control technology  ControlCOCKPIT TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays.  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventiliation  Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control acceptable interface in USB port  Control approx. 20°C above nominal temperature  Temperature control overtemperature imiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature, heating is switched off in case of overtemperature.  Autodiagnostic system for feult analysis  Alarm visual and accustic	Temperature	
Setting accuracy temperature  7 Emperature sensor 2 Pt100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error  Control technology  Control COCKPIT TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays.  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature in temperature monitor TWA, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature.	Setting temperature range	+20 to +80 °C
Temperature Sensor 2 P100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error  Control technology ControlCOCKPIT TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays.  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Sterillisation fixed sterillisation programme (4 hours/160°C) for sterillisation of working chamber, not for sterillising the load  Ventillation Convection natural convection Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure  Programming AlmocONTROL software on a USB stick for programming, managing and transferring programmes via Ethemet interface or USB port  Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the septonit value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature.	Working temperature range	at least 5 above ambient temperature to +80 °C
Control technology ControlCOCKPIT TwinDISPLAY, Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays.  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation Convection natural convection Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint in case of over- or undertemperature, heating is switched off in case of over- or undertemperature, heating is switched off in case of over- or undertemperature, heating is switched off in case of over- or undertemperature, heating is switched off in case of over- or undertemperature, heating is switched off in case of over- or undertemperature, heating is switched off in case of over- or undertemperature, heating is switched off in case of over-temperature.	•	0.1 °C
TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays.  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature	Temperature sensor	2 Pt100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error
TFT-colour displays.  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature	Control technology	
Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display.  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature.	ControlCOCKPIT	·
Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature	Timer	Digital backwards counter with target time setting, adjustable from 1 minute to 99 days
adjustable parameters  temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Sterilisation  fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Convection  natural convection  Fresh air  Admixture of pre-heated fresh air by electronically adjustable air flap  Vent  vent connection with restrictor flap  Communication  Documentation  programme stored in case of power failure  Programming  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control  mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY  additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature	Function SetpointWAIT	the process time does not start until the set temperature is reached
Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature	Calibration	three freely selectable temperature values
Ventilation Convection natural convection Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature  Autodiagnostic system for fault analysis	adjustable parameters	
Convection  Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature  Autodiagnostic system for fault analysis	Sterilisation	
Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature  Autodiagnostic system for fault analysis		natural convection
Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature  Autodiagnostic system for fault analysis	Fresh air	Admixture of pre-heated fresh air by electronically adjustable air flap
Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature  Autodiagnostic system for fault analysis	Vent	vent connection with restrictor flap
Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature  Autodiagnostic system for fault analysis		programme stored in case of power failure
Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature  Autodiagnostic system for fault analysis	Programming	
approx. 20°C above nominal temperature  overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY  additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature  Autodiagnostic system  for fault analysis	Safety	
AutoSAFETY  additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature  Autodiagnostic system  for fault analysis	Temperature control	
value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature  Autodiagnostic system for fault analysis	Temperature control	
	AutoSAFETY	value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off
Alarm visual and acoustic	Autodiagnostic system	for fault analysis
	Alarm	visual and acoustic

## Standard equipment

Works calibration certificate	incl. works calibration certificate for +37°C
Door	fully insulated stainless steel door with 2-point locking (compression door lock)
Door	inner glass door
Internals	1 stainless steel grid(s), electropolished

#### Stainless steel interior

Interior	easy-to-clean interior,made of stainless steel, reinforced by deep drawn ribbing with integrated and protected large-area heating on four sides
Volume	32
Dimensions	w <sub>(A)</sub> x h <sub>(B)</sub> x d <sub>(C)</sub> : 400 x 320 x 250 mm
Max. number of internals	3
Max. loading of chamber	60 kg
Max. loading per internal	20 kg

## Textured stainless steel casing

Dimensions	w <sub>(D)</sub> x h <sub>(E)</sub> x d <sub>(F)</sub> : 585 x 704 x 434 mm (d +56mm door handle)
Housing	rear zinc-plated steel

#### **Electrical data**

Voltage	230 V, 50/60 Hz
Electrical load	approx. 1600 W
Voltage	115 V, 50/60 Hz
Electrical load	approx. 800 W

#### **Ambient conditions**

Overvoltage category  Pollution degree	max. 80 %, non-condensing
Ambient temperature	+5 °C to +40 °C
Altitude of installation	max. 2,000 m above sea level
Set Up	The distance between the wall and the rear of the appliance must be at least 15 cm. The clearance from the ceiling must not be less than 20 cm and the side clearance from walls or nearby appliances must not be less than 5 cm.

### Packing/shipping data

Transport information	The appliances must be transported upright
Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
Dimensions approx incl. carton	w x h x d: 660 x 890 x 650 mm
Net weight	approx. 48 kg
Gross weight carton	approx. 64 kg

## Standard units are safety-approved and bear the test marks
