Benchtop centrifuge

- Unrefrigerated
- Refrigerated
- Refrigerated / heatable

Most versatile 3-liter centrifuge in the industry

Sigma is a leading international manufacturer of laboratory centrifuges for diverse sectors, including biotechnology, pharmaceutical, medical and environment analysis. Laboratories, institutions and companies everywhere in the world have been relying on premium Sigma quality – Made in Germany – for more than 40 years. The company stands for innovative products and development of durable, energy-efficient and especially user-friendly devices.

The Sigma 4-16 centrifuge series features outstanding versatility, performance and capacity. With maximum RCF up to 5,526 x g with a swing-out rotor or 25,155 x g with a fixed-angle rotor, they are the most versatile three-liter centrifuges in the industry.

Large specimen volumes can also be processed efficiently thanks to the maximum capacity of 4 x 750 ml in a swing-out rotor or 6 x 250 ml in a fixed-angle rotor. Smooth running guarantees excellent, reproducible sedimentation results, for which reason this compact centrifuge series is recommended not only for routine tasks but also for demanding applications in research and industry.

Along with the unrefrigerated Sigma 4-16S, the refrigerated Sigma 4-16KS and Sigma 4-16KHS versions enable operation over an extended temperature range. The temperature of this refrigerable and heatable centrifuge can be set from -20°C to +60°C. That makes it particularly suitable for specimens that need to have their viscosity lowered during centrifugation.

High throughput in the laboratory

Result-oriented, convenient and robust

The Sigma 4-16 centrifuge series is designed for research tasks as well as routine procedures in laboratory operations. With their versatile rotor configurations, these models are suitable for research laboratories, hospitals, universities, cell culture applications, pharmaceutical laboratories, and applications in the biotechnology sector.

Along with excellent specifications, the series offers intuitive operation and advanced features. The patented one-knob Spincontrol S controller provides superior operating convenience, safety and versatility. Thanks to the intuitive user interface and the clearly organised

menu structure, operating parameters can be entered and adjusted quickly. The acceleration and braking curves (30 each) facilitate optimisation of separation runs and results. Routine procedures can be stored with user-defined names and quickly retrieved from the integrated process library.

With automatic rotor identification, run time and speed monitoring, password-protected access to the controller and secure program storage, the centrifuges ensure uncompromising safety.

Sigma 4-16S

- Universal benchtop centrifuge
- Speed range up to 13,500 rpm
- Maximum capacity: 4 x 750 ml
- User-friendly Spincontrol S controller
- Extra large TFT display
- 60 programs
- Compact, space-saving unit
- Low noise level
- Automatic rotor identification
- Zero-maintenance induction motor
- Motorised lid lock
- Automatic imbalance monitoring
- Rotor life monitoring for high safety
- Easily cleaned stainless steel chamber
- Window in lid for external speed monitoring
- Produced in compliance with the latest national and international standards (e.g. EN 61010-2-020)

Sigma 4-16KS

All features of the Sigma 4-16S, plus:

- Speed range up to 15,000 rpm
- High-performance cooling
- Temperature setting range: -20 °C to +40 °C
- Pre-cooling function "Rapid Temp"
- Rotor cooling also possible at standstill

Option

- Inert gas version with inert gas injection system

Sigma 4-16KHS

All features of the Sigma 4-16KS, plus:

- Heatable refrigerated centrifuge
- Standstill cooling or heating
- Temperature setting range: -20 °C to +60 °C

Rotors and accessories

Large selection and a multitude of applications

The compact Sigma 4-16 series is available with numerous swing-out and fixed-angle rotors, various buckets and adapters. The extensive port-folio of accessories can accommodate tubes from 0.2 ml to 750 ml as well as microtiter and deepwell plates.

The swing-out rotors can hold up to 3 liter (4 x 750 ml) or for example up to 60 conical 15 ml tubes. In many cases the configurations achieve best-in-class RCF for this centrifuge segment. Unique in the

domain of fixed-angle rotors are the 6 x 250 ml rotor with a maximum RCF of 13,131 x g and the ability to centrifuge 50 ml culture tubes at more than 23,000 x g.

As a special feature, Sigma can produce custom accessories upon request. The rotors and accessories are made from certified high-grade materials to withstand the most severe stresses.

Cleanroom

Robust and resistant

**Cleanroom
coating**
Available for all
accessories

An extremely resistant cleanroom coating is available from Sigma for all aluminium buckets and rotors. This coating provides reliable corrosion protection for accessories, especially where aggressive chemicals

are used. The cleanroom coating can even withstand exposure to sodium hydroxide and hydrochloric acid. The surfaces are also food-grade (FDA certified) and can easily be cleaned without residues.

Material properties

Guideline for optimal tube selection

Due to the many factors that influence material properties, this overview is only intended as a general recommendation. There is no guarantee of the stated properties. Users should therefore carefully

test materials for suitability under specific application conditions. Tubes should be discarded as soon as they show any sign of material fatigue.

Spincontrol S controller

Intuitive operation and many options

The patented one-knob Spincontrol S controller sets standards in control technology for laboratory centrifuges. All parameters, such as speed, RCF or temperature, are set using the multifunction knob and can even be altered during operation. Illuminated buttons for starting, stopping and lid opening facilitate access to these functions.

Along with manual parameter configuration, previously entered programs can be selected via shortcuts. These programs can be assigned alphanumeric names to enhance process reliability and simplify operation. Another practical feature is the progress bar that visualises program status and can be seen at a distance. All setpoint and actual values are constantly shown on the clearly organised display.

The countless features leave nothing to be desired: time after target speed reached, capacity for 60 programs, password protection to prevent unintentional alteration of operating parameters, and the rotor cycle counter are just a few of the highlights that make the Spincontrol S controller a highly versatile system that is ready to meet the laboratory requirements of the future.

This premium controller from Sigma supports internal quality management functions as well as external communication with a laboratory information management system (LIMS). That way the Spincontrol S supports traceable professional reporting.

Centrifuge tables

Sigma centrifuge tables are available in six different sizes. Matched to the corresponding centrifuge dimensions, they combine convenient work height with an optimally calculated footprint. The tables are made from coated sheet steel and are equipped with a storage compartment (with two doors) and a convenient pull-out shelf. Lockable castors allow the centrifuge tables to be easily moved and positioned in the laboratory.

Premium quality

Made in Germany

The Sigma 4-16 series meets the highest technical requirements of laboratory standards. Developed and produced at our facility in Osterode, Germany, they are high-performance, durable and energy-efficient quality products and conform to the latest safety, emissions and environmental standards. Sigma guarantees the availability of spare parts and wearing parts for at least 10 years.

Furthermore, you benefit from our extensive services portfolio, including commissioning, maintenance, device calibration and more. Our qualified service technicians are ready to provide professional maintenance and repair as well as loaner devices if necessary. All support services are designed to maintain reliability and optimise system availability.
