RemB

A New Micro Evolution in Removing Bone

RemB represents our continued dedication to produce surgical instruments that are highly reliable and easy to use. This versatile micro electric system combines the trusted performance of the CORE console with lightweight, specialized handpieces, allowing surgeons to work effectively with greater precision and control.

RemB U DRIVER

Modular, pistol grip handpiece utilizes various drilling, reaming, pinning, and cutting attachments. This electric console driven handpiece uses a wide variety of attachments to perform various small bone orthopedic procedures.

TRUSTED PERFORMANCE PROVEN RELIABILITY

RemB SAWS

The new Titanium lineup includes three dedicated, high performance saws specifically designed for exceptional ergonomics, power and agility.

Oscillating Saw

- Toolless blade mount

Reciprocating Saw

- Easy, intuitive insertion/removal of blades without tools

Sagittal Saw

- Rotating, indexing head for maximum blade positions
- Special mount facilitates larger blade

EXCEPTIONAL POWER CONTINUED TRADITION

RemB DEDICATED WIREDRIVER
